## RESIDENTIAL SERIES DATA SHEET

### **SSLT Between the Glass Blinds - Lift & Tilt**

A magnetically coupled lift and tilt aluminum mini-blind for installation in sealed insulated glass packages. The blind is controlled by two externally mounted magnet assemblies, which are coupled to corresponding internal magnet assemblies. Moving the outer tilt operator to the left or right will cause the blind slats to rotate. Moving the outer lift operator down will cause the blind to raise and moving it up will cause the blind to lower.
